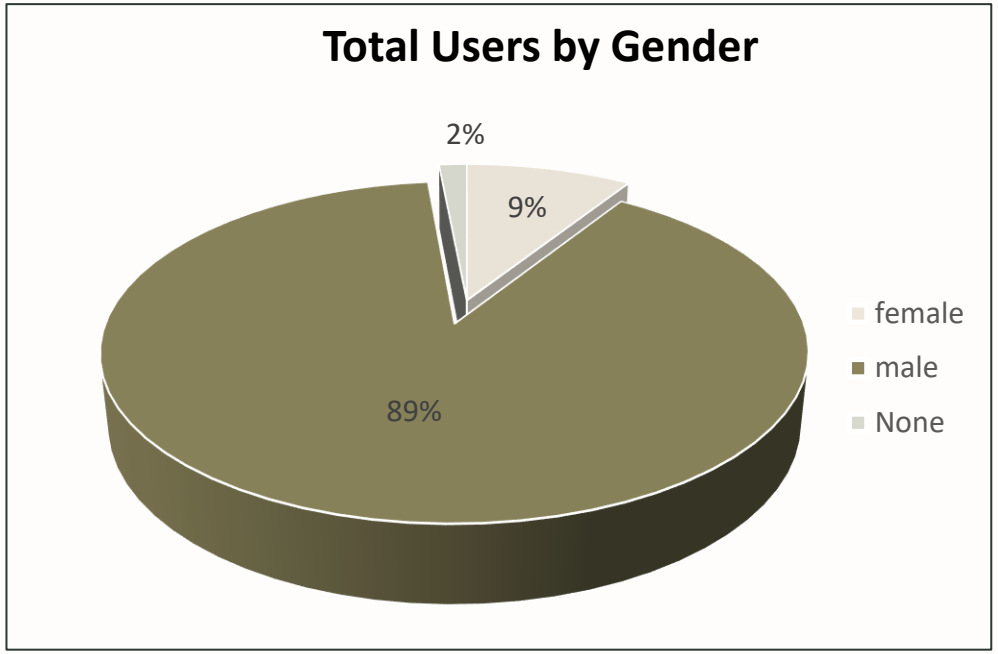
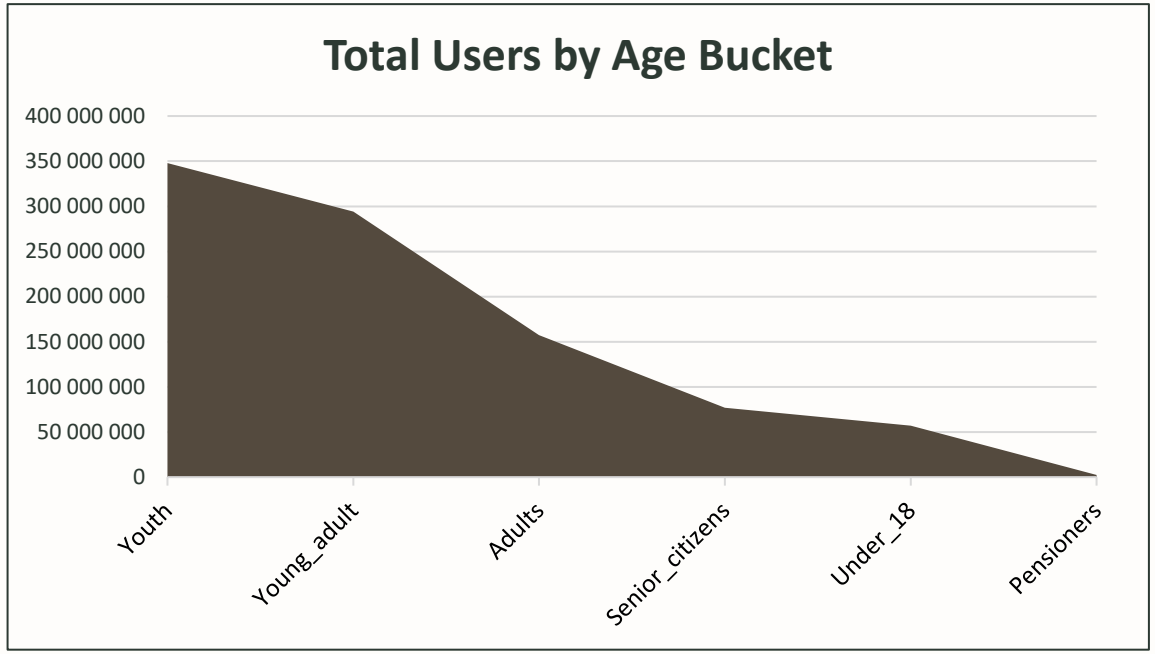
Metrics & KPIs

Q & A

USER DEMOGRAPHICS (1)

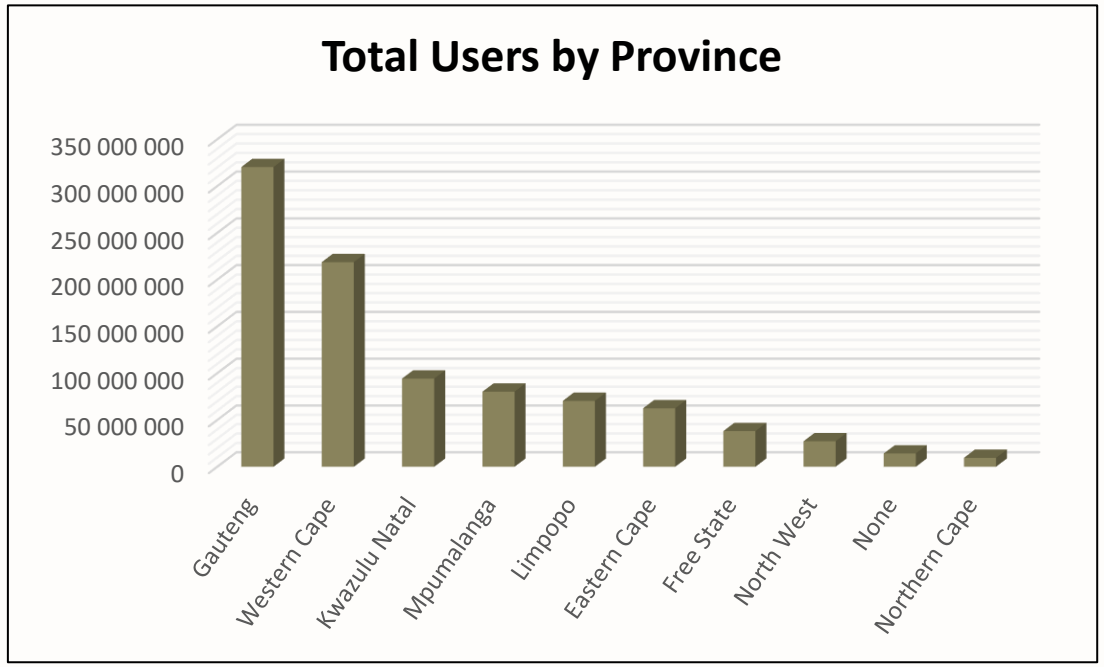


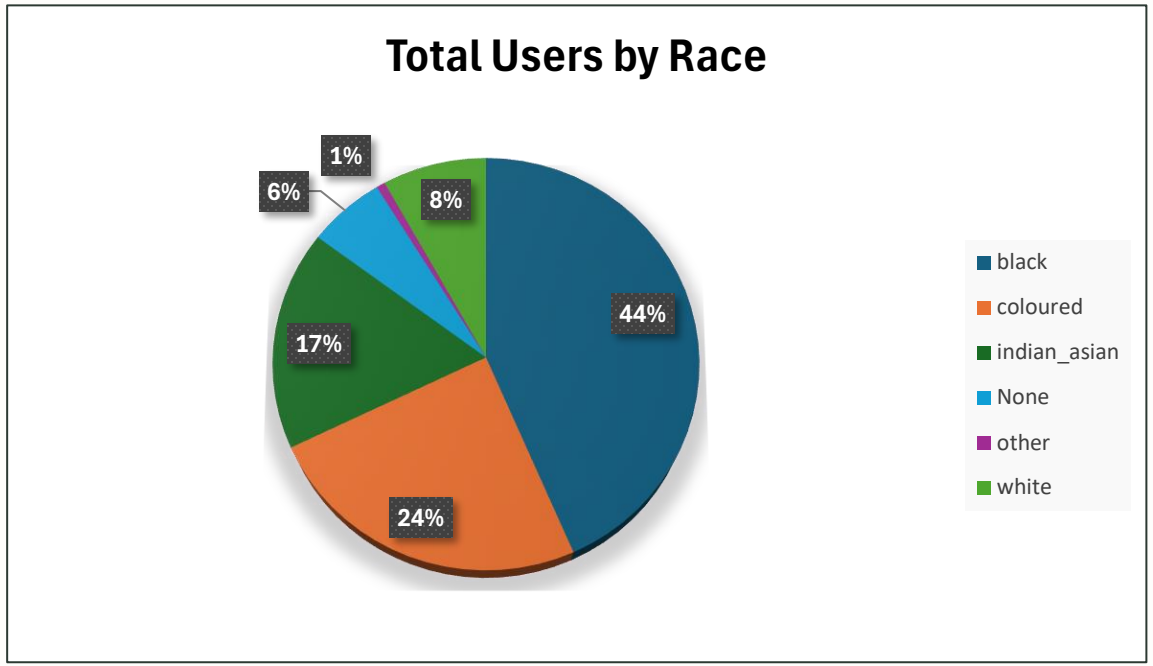


- Majority of the viewers are males , representing 89% of the viewership while females represent only 9% and not specified gender 2%.

- Youth category with ages (18-28 years) represent the majority of viewers accounting for 37% of the viewer ship , followed by young adults (29-38 years) which accounts for 31%. Under 18 and pensioners(58+ years) have the least viewership in the age category , only accounting for 6% and 0.3% respectively .

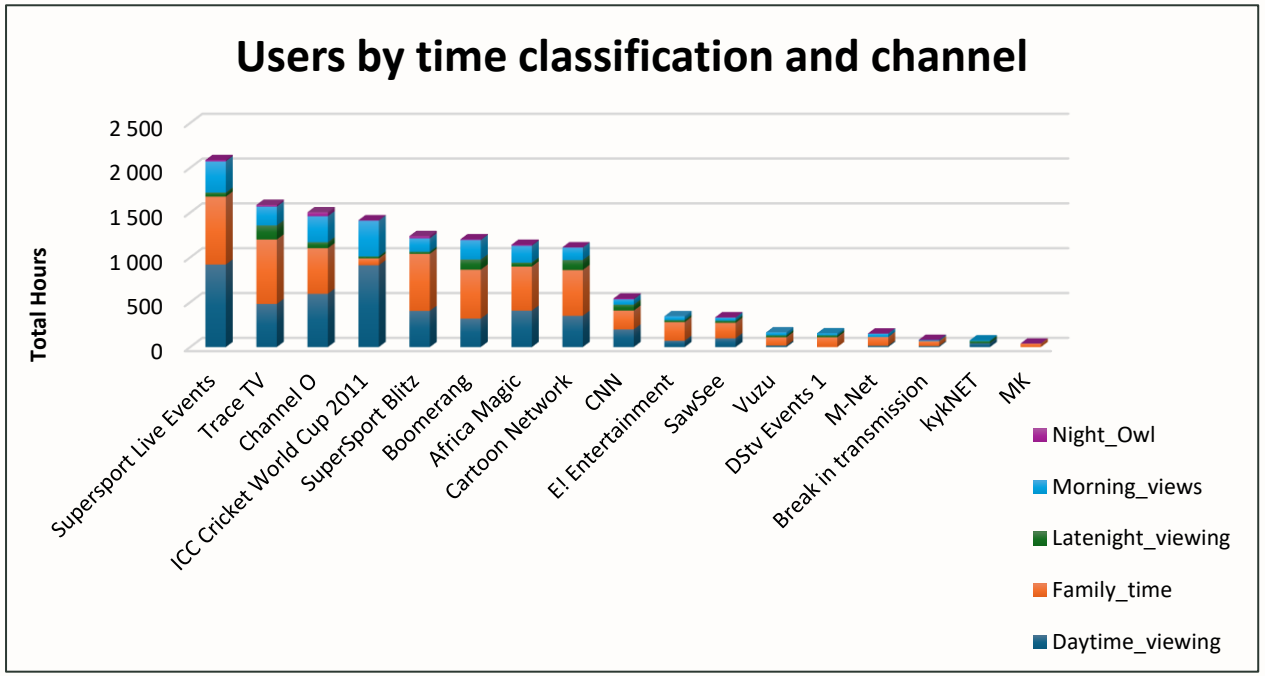
USER DEMOGARAPHICS (2)

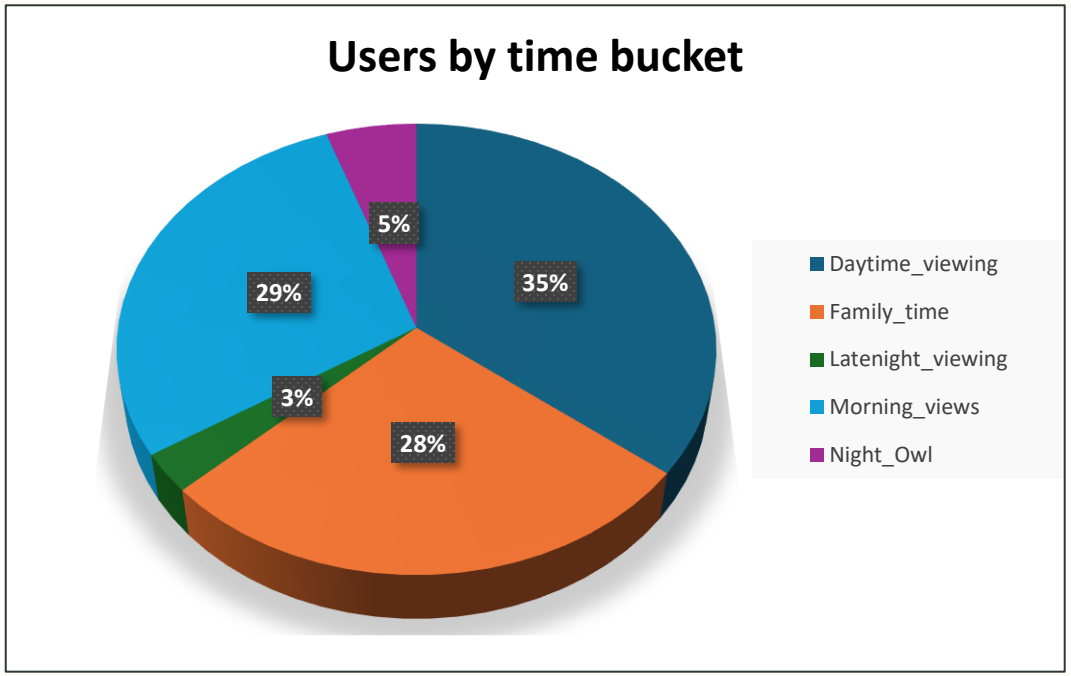




- Majority of the viewers are from Gauteng province , representing 34% of the viewership.
- Western Cape has the second highest views , representing 23% of the viewership.
- High population concentration, better infrastructure and access, urbanization, high income levels, business and media hub are all factors contributing to the high viewership observed by both provinces.
- Black people represent the majority of viewers in the race category, accounting for 44% of the viewership.
- Coloured people have the second highest viewership distribution accounting for 24% of the total viewership.
- Indian-Asian people have the third highest viewership.
- Black people viewership is the highest across provinces except for the Eastern Cape where coloured people have the highest viewership.

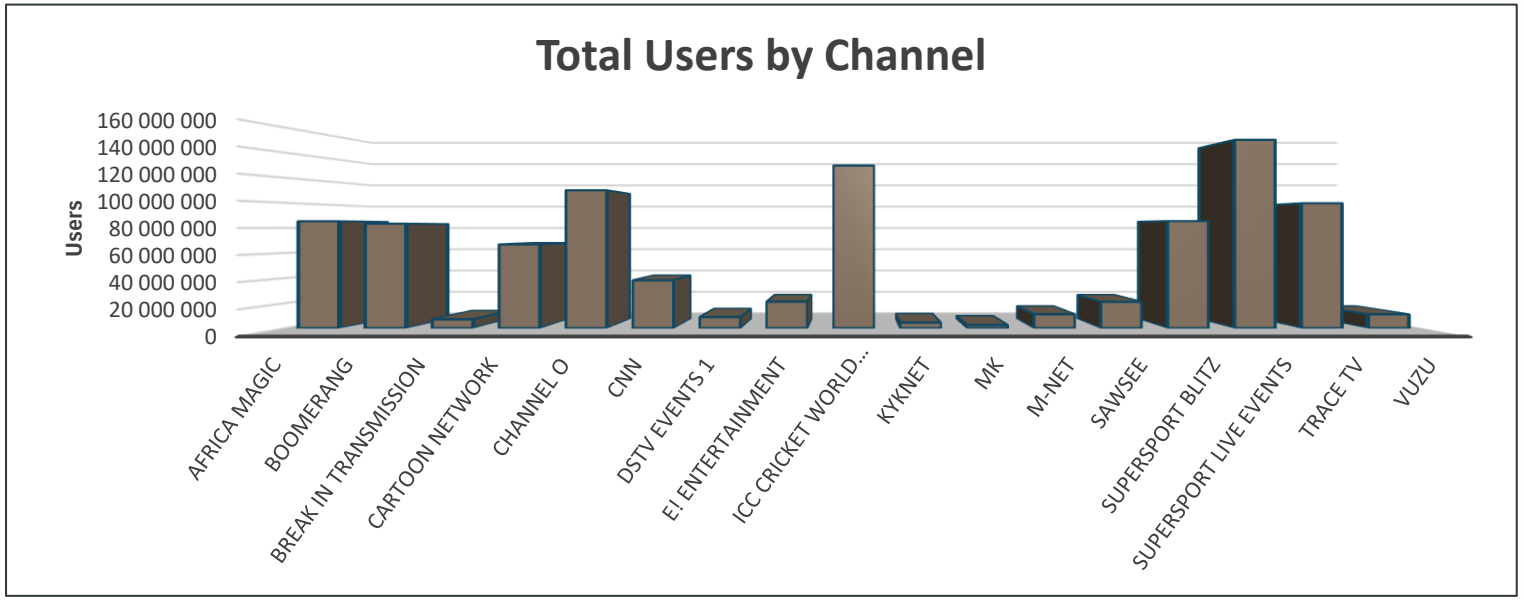
CONTENT PERFORMANCE



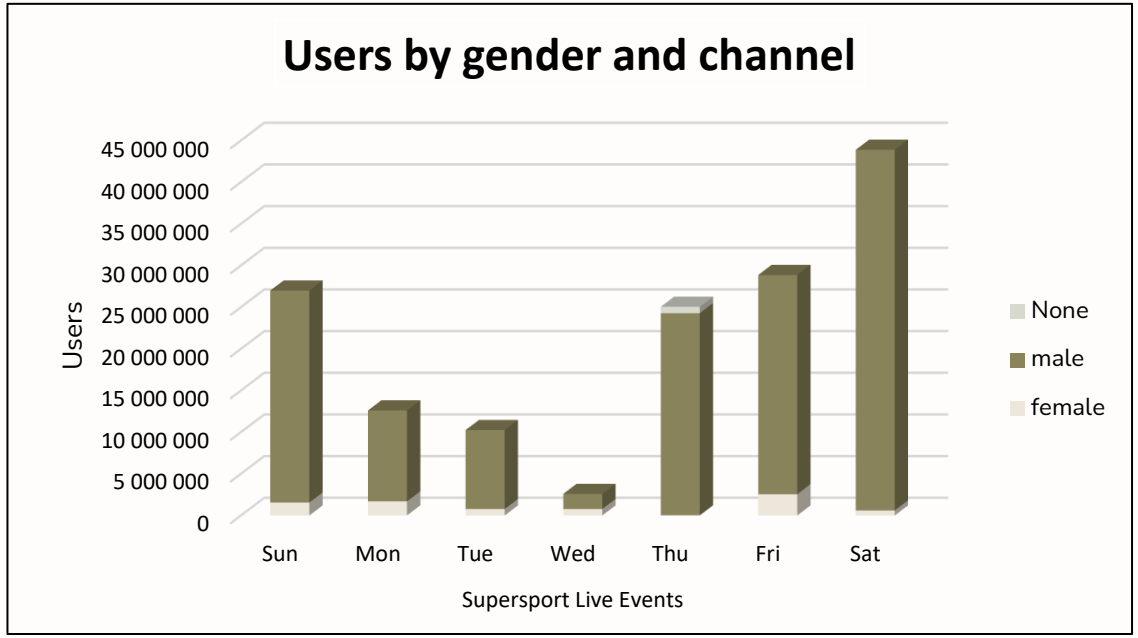


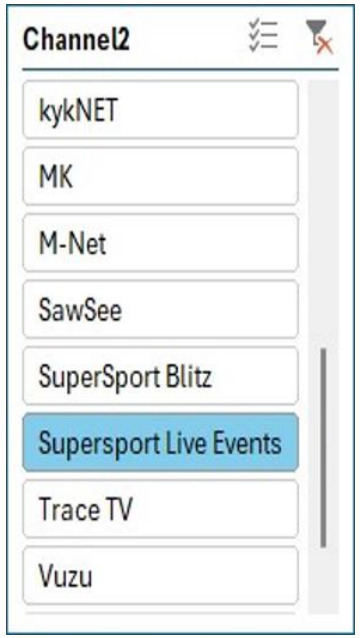
- Sports channels (Supersport Live, ICC Cricket and Supersport Blitz) has the most viewer hours collectively accounting for 36% with day-time (11:00- 16:00) viewing and family time (17:00 -21:00) accounting for the most hours by time bucket.
- Music channels (Trace TV and Channel O) represent (26%) collectively of the viewer hours with day-time and family time accounting for the most hours by time bucket.
- Boomerang and Cartoon Network collectively account for 17% of the viewer hours during family time .
- Most hours spent on the tv are between 05:00 – 21:00 which is mainly when most people are up.

VIEWERSHIP BY CHANNEL



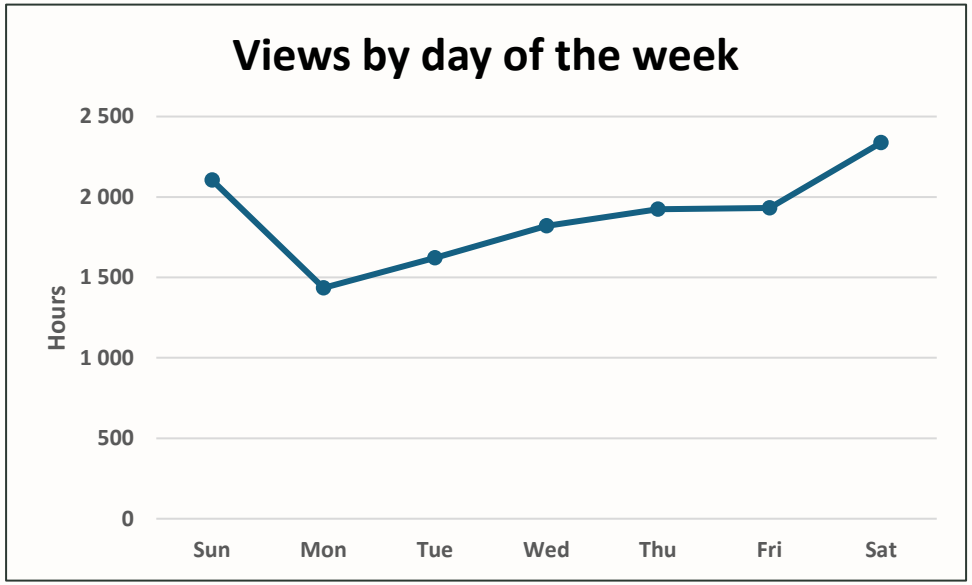
- Supersports live channel has the most views , followed by ICC Cricket World Cup (and Channel O which is a music channel and are mainly watched by males.
- MK, kyknet and break in transmission are the least viewed channels.

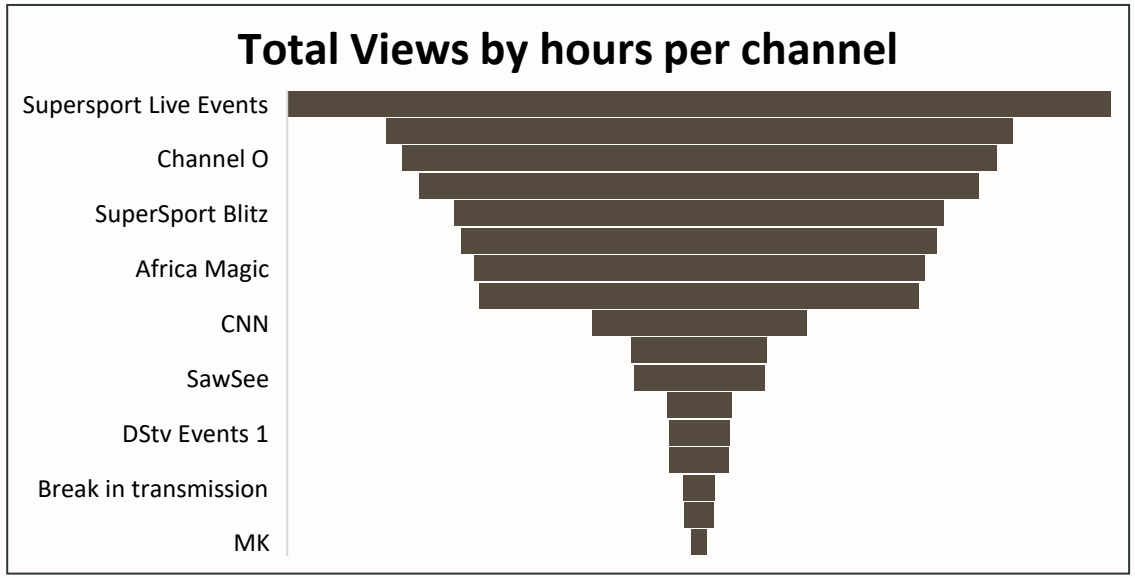




- Channels mostly watched by male viewers throughout the week is SuperSport Live Events which broadcasts live sports events and has more viewership between Thurs and Sunday .
- Supersports blitz has only male viewers on Sunday and Monday .

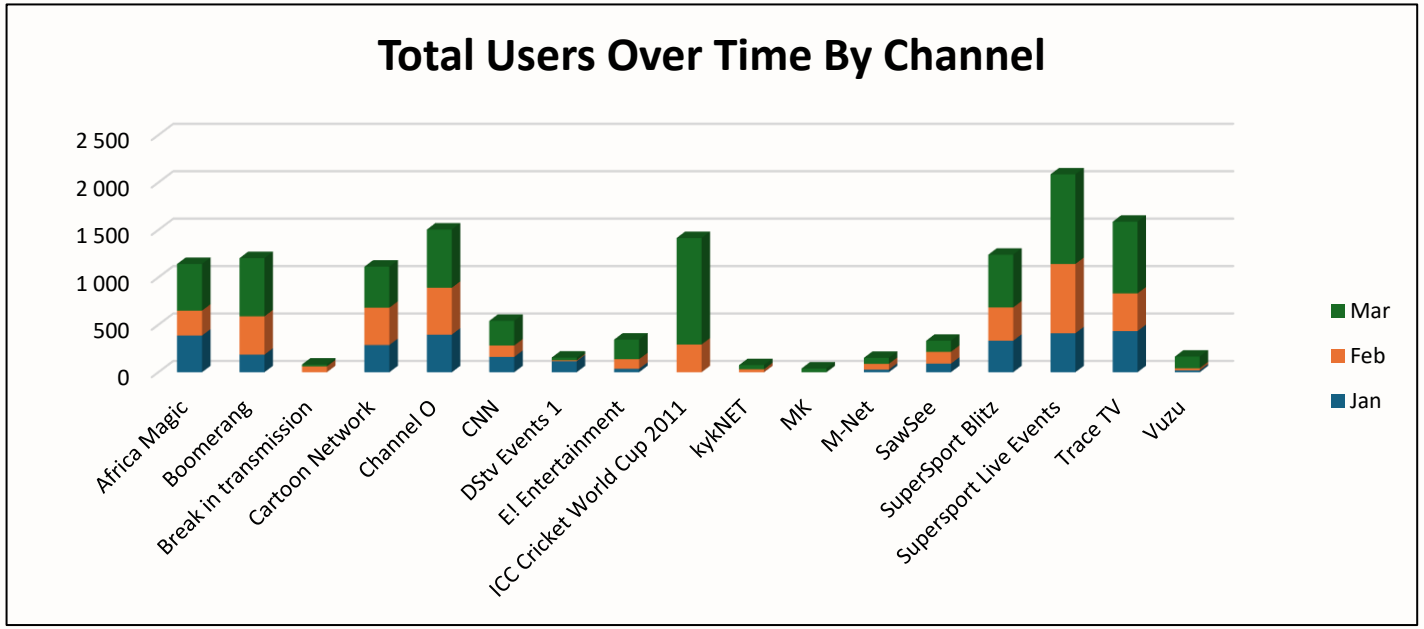
ENGEGEMENT TRENDS

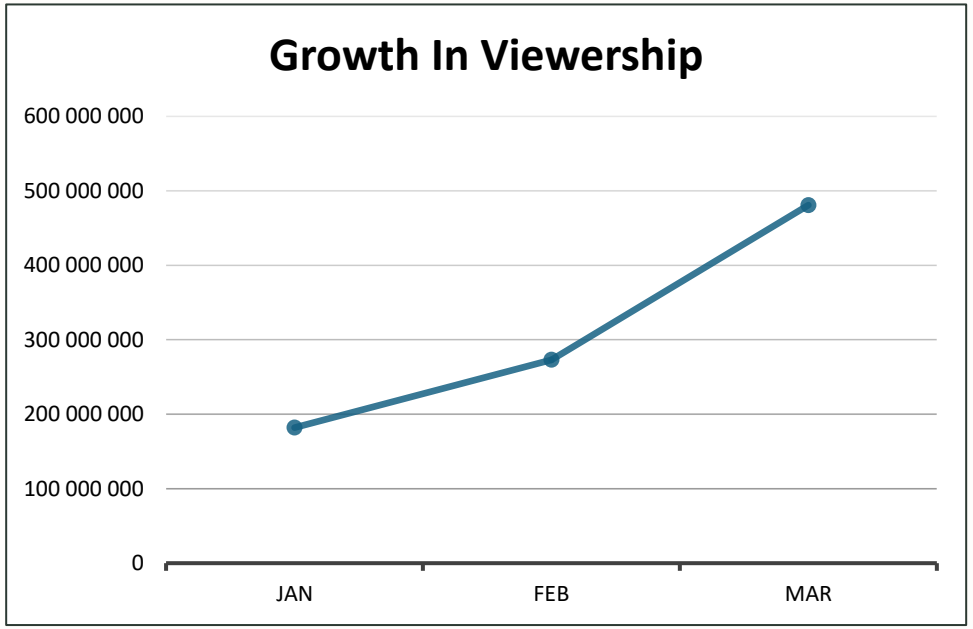




- Saturday has the highest number of hours viewed (18%) followed by Sunday (16%).
- Viewership decreases on Monday as the week starts and then starts picking up from Wednesday as the week approaches the weekend.
- Supersport Live has the most views by hours followed by Tace TV and Channel O . ICC Cricket comes in fourth place when it comes to viewing hours because it’s a world cup with live games that end compared to music playing throughout the day .

ENGEGEMENT TRENDS





- There is an upward trend in users over the months with March having the most viewership (51%) doubling January viewership.
- The reason for this spike is the ICC Cricket world cup which takes place in March leading to more users signing up for viewing . The channel has 0 viewers in Jan to having 1 123 viewers in March.
- Supersports Live Events and Supersports Blitz doubles viewership in March from January as the month marks the beginning of sports season.
- Trace tv and channel O also see a spike in viewesrship in March due to music awards taking place during this time.

INSIGHTS AND RECOMMENDATIONS

- TV viewership is male-dominated, indicating stronger engagement among men.
- The youth segment (18–38 years) drives the majority of viewing, showing TV remains highly relevant for younger audiences.
- Gauteng and Western Cape contribute the largest share of viewers, making them the primary viewership hubs.
- Black and Coloured audiences show the highest TV consumption compared to White audiences.
- Sports channels lead in viewership, followed by music channels.
- Boomerang and Cartoon Network show increased viewership during daytime and family time indicating a strong family and co viewing behaviour where parents are watching tv together
- Viewership peaked in March, driven by the ICC Cricket World Cup and increased sports content.
- Highest viewing occurs during daytime viewing and family time (evening) with weekend peaks: Saturday and Sunday have the highest engagement.

RECOMMENDATIONS

- Increase investment in sports content and live events and schedule sports-related shows, highlights, and analysis around major tournaments.
- Target youth-focused content by expanding youth-oriented programming, including music, reality shows, and lifestyle content. Integrate social media and second-screen engagement to retain younger viewers.
- Optimise weekend and family-time scheduling by place premium content and premieres on weekends and evenings. Use family-friendly programming blocks to maximise shared viewing.
- Strengthen regional marketing by focusing advertising and campaigns in Gauteng and Western Cape where audience concentration is highest. Use regional partnerships and localised promotions through billboards and competitions.
- Tailor advertising and representation by aligning advertising strategies with key audience demographics (male, youth, Black and Coloured audiences) through partner with brands targeting these segments.
- Cross-promote between sports and music channels to grow reach and retention. Aswell as promoting kids shows to capture parents and increase family time viewing
- Strengthen daytime and early evening kids programming to capitalise on co viewing trends .

THANK YOU !!
